2.0 CLARIFICATION Bid Item 630.01 Sewer Lateral

Removal and replacement of the curb and sidewalk are to be incidental to this Bid Item.

3.0 CLARIFICATION Funding Under the American Recovery and Reinvestment Act 2009 regarding products manufactured in the United States.

Section 1605 of the Recovery Act requires that all iron, steel and manufactured goods used in construction, alteration, repair, or maintenance of a public building or public work project assisted with funds under the Recovery Act must be produced in the United States, unless the Secretary finds that: the requirement is inconsistent with public interest; those goods are not reasonably available or produced in sufficient quantity in the U.S.; or the use of the goods will increase the project cost by more than 25 percent. Grantees must request a waiver of this provision if, in the process of carrying out an eligible activity, one of these conditions arises. If the Secretary determines that it is necessary to waive this requirement, he must publish in the Federal Register a detailed written justification why the requirement was waived; therefore, all grantees are expected to adhere to these provisions. These requirements must be applied consistent with U.S. obligations under international agreements. To streamline compliance with the provision of Section 1605 in determining the project cost using American-made materials, grantees may want to consider acquiring two cost estimates with bids: one with only American-made materials and the other with any materials.
