INTRODUCTION

This section describes the physical tasks you will be required to perform for the North Las Vegas Physical Fitness Examination for Entry-Level Police Officer / Corrections Officer. You may increase your chances of obtaining your best possible score if you spend a fair amount of time preparing for the test. This includes thoroughly reviewing this booklet, following the specific directions given regarding attire, paying proper attention to your physical well-being before the test and taking care to avoid becoming overly anxious about the test. It is strongly suggested that you check with your physician regarding your ability to participate in this phase of testing.

OVERVIEW OF THE TESTING PROCESS

Police Officers / Corrections Officers perform many essential or important physical functions which are vital to their job duties. Though too numerous to list in detail, they include running (speed and distance), climbing objects, pulling oneself through an opening, walking, sitting, standing for long periods of time, arresting resisting individuals and handling inmates and inmate situations on a daily basis. The Physical Fitness Examination for Entry-Level Police Officer / Corrections Officer, which you will be required to successfully pass, measures physical condition which is necessary for successful performance in these positions.
TEST PREPARATION

On the day of testing, all candidates are required to wear:

- Athletic or running shorts, sweat suits
- Light T-shirt
- Running/gym shoes

Note: You will not be allowed to participate in this phase of testing if you are not wearing proper attire.

DESCRIPTION OF THE TEST

The Physical Fitness Exam is structured to measure upper body strength, cardiovascular endurance and flexibility (see attached sample format).

Vertical Jump Test: This test measures leg power which is important in vaulting objects such as walls and ditches and in moving heavy objects such as people. The vertical jump begins with one body side toward the wall, heels together, and reaching upward as high as possible. Then using a rocking, one-step approach ("step-feet together-jump"), jump as high as possible, reaching upward at the same time. The number of inches between the standing reach and the jumping reach, measured to the nearest half inch, is the score. Must meet the required standard of 14 inches.

One Minute Sit-up Test: This test measures muscular endurance which is important for performing tasks that involve the use of force. The sit-up begins while lying on the back with legs bent at the knees at approximately 90 degree angles, heels flat on the floor, hands interlocked behind the head, with elbows out to the sides. A partner will be required to hold the feet down firmly. The buttocks must remain in contact with the floor at all times. One repetition will be counted using this procedure. The neck must remain in a neutral position; no jerking is allowed. If the hands break apart, the sit-up will not count. Candidates will have one (1) minute to complete as many sit-ups as they can. Resting is allowed only in the "up" position. Must meet the required standard of 15 in 1 minute.

Maximum Push-up Test: (Not timed) This test measures the muscular endurance of the upper body muscles. This is important for use of force involving any pushing motion. The push-up begins while lying down on the floor into the front leaning and rest position. Lower the body until the upper arms are parallel to the floor, then push up again. The back must be straight, and in each extension up, the elbows must lock. Resting is allowed only in the up position. Must meet the required standard of 18.

300 Meter Run Test: This is a test of anaerobic capacity which is important for performing short intense bursts of effort such as foot pursuits, rescues and use of force situations. Participants need to cover the distance as fast as possible. Participants line up at the starting line. Once instructed to "go," complete the course as quickly as possible. Must meet the required standard completion time of 77 seconds.

1.5 Mile Run/Walk Test: This test is a measure of cardio respiratory endurance or aerobic power. This is important for performing tasks involving stamina and endurance (pursuits, searches, prolonged use of force situations, etc.) and for minimizing the risk of cardiovascular health problems. This test may be run or completed in a combination of running and walking. The test begins at a designated starting line and concludes after the applicant crosses the designated finish line. The time it takes an applicant to complete the 1.5 mile run/walk test will be measured in minutes and seconds. Must successfully complete the 1.5 mile run/walk test within the specified time limit of 17 minutes, 17 seconds.
In order to pass the physical fitness examination, applicants must meet the single standard fitness norms for all five exercise events. These events and norms are listed in the table below. These norms are currently used as an entrance requirement by Nevada POST.
