RE: North 5th Street Super Arterial Phase 1D Multimodal Connector

Dear Mr. DeVaul:

On behalf of the Regional Transportation Commission of Southern Nevada (RTC), I would like to extend our support for the City of North Las Vegas' North 5th Street Super Arterial Phase 1D Multimodal Connector Project.

The North 5th Street Super Arterial Phase 1D Multimodal Connector Project is critical to the economic redevelopment and future growth of downtown North Las Vegas. Specifically, this project will construct a grade separation to allow North 5th Street, an important north-south arterial, to cross over Losee Road. The completed project will improve transportation alternatives for transit riders, motorists and pedestrians travelling in North Las Vegas.

The RTC views this project to be a strong candidate for funding under the TIGER III Grant Program. We look forward to working with you on this project as the RTC works to transform one arterial at a time to ensure that our streets are attractive, accessible and safe to all modes of transportation in Southern Nevada. If I can be of any further assistance, please contact me at (702) 676-1505.

Sincerely,

Jacob Snow
RTC General Manager
