

CDBG-R
NORTH 5th AND DONNA STREETS WATER LINE BOLSTERING PROJECT

The City of North Las Vegas Utilities Department will upgrade the water lines in an area bounded by Carey Avenue on the north, Donna Street on the east, Orr Avenue on the south and North 5th street on the west. Water lines in the project area were installed in 1953 and consist of 4-inch asbestos cement pipe and include 'post" type fire hydrants. The main size and type of hydrants do not meet current standards and can deliver only 750 gallons per minute (gpm) where 1,500 gpm is required.

The project proposes to replace approximately 2,300 lineal feet of 4-inch water main with 8-inch water main in Lillis Avenue and Glendale Avenue including the replacement of two (2) existing fire hydrants.
