**October 18, 2022**

**CITY OF NORTH LAS VEGAS  
REQUEST FOR PROPOSAL (“RFP”)  
RFP 2022-005 AV System for the City Council Chambers**

**Addendum #1**

The deadline for questions for this proposal was 12:00 p.m., Monday, October 3, 2022.

The following are the questions that were received along with the answers to those questions.

**Question 1. Are we doing fire alarm?**

*Answer: No*

**Question 2. Are we doing access control?**

*Answer: No*

**Question 3. Are we doing cameras?**

*Answer: As per the RFP there will be 1 camera that will need to be relocated in order to mount new screens but there will not be any additional cameras added. All existing cameras will stay*

**Question 4. Do they need an intercom or paging system?**

*Answer: No*

**Question 5. Does the site need cell phone boosters?**

*Answer: No*

**Question 6. Do they have an in-house or third-party network team that oversees their network server so we can get specs for their needs?**

*Answer: Yes there is an in house network team. Any new equipment that requires network access will need to be coordinated with the City network team for access*

**Question 7. Will there be cable TV at any locations?**

*Answer: No*

**Question 8. May I get the following documents?**

- *Low voltage Plan*
- *List of audio zones and how they want to control them (in wall keypad or phone app)*
- *Location of Audio equipment*
- *TV sizes and locations*
- *Digital signage locations and sizes*
- *Projector location and Screen Sizes*
- *Wifi Network and will there be a guest network*
- *Locations for hard wired internet or phone system*

*Answer:*

- *Low voltage Plan – See RFP*
- *List of audio zones and how they want to control them (in wall keypad or phone app) – Currently there are 3 zones all controlled by the touch screen control at the end of the Pit. Zones include Council Chambers, Lobby, Bathrooms*
- *Location of Audio equipment – AV room located behind Council Chambers room. See RFP for maps*
- *TV sizes and locations – See RFP*
- *Digital signage locations and sizes – See RFP*
- *Projector location and Screen Sizes – See RFP*
- *Wifi Network and will there be a guest network – WiFi networks are existing and additions can be added by City IT Department as needed*
- *Locations for hard wired internet or phone system – Uplink to the City network with Internet access in in the AV room*

**Question 9. Can we cut/drill into the dais table to add USB charging?**

*Answer: We are removing the following language from Page #6 Miscellaneous (optional)– remove “Fixed USB charging in the dais”.*

**Question 10. Which specific Video Conferencing Systems are desired to implement? The RFP states 3 but says etc afterwards. Knowing the exact amount will expedite designing.**

*Answer: It would be our preference for a system that is Video Conference system agnostic being able to use any platform without limitations*

**Question 11. How many wireless mics are to be replaced? Under the microphone section it only states “New wireless microphones.”**

*Answer: There are currently 4 wireless Sure system microphones. 2 handhelds and 2 lapel*

**Question 12. How many additional pit inputs are desired? RFP only states “additional pit inputs” under the video inputs section.**

*Answer: RFP should state “4 additional pit inputs”*

**Question 13. Where is the “admin” pc/tablet location for control over every input and output?**

*Answer: It would be our preference that any PC on the network in our IT department could have control preferably from a web interface*

**Question 14. What content are you wanting to share on the Touch Monitor to be installed at the podium beside the document camera?**

*Answer: It would be our preference if this is possible for the screen to be a 2<sup>nd</sup> mirrored display from the “Presentation PC” that is located in the pit area in front of the podium. We would also like for this to be touch enabled to also be able to mark up. Finally would want the ability to switch to a PC that is located under the podium possibly by a KVM or input switcher*

**Question 15. For the Existing Press Feeds, are we using existing cabling or running new cables along with the cables needed to add video outputs to those press feeds?**

*Answer: There should be no need to re run the existing cabling unless it is determined that there is cabling causing issues*

**Question 16. Is the city providing electricians/contractors for pathways for the new Press Feed #5 box to be implemented?**

*Answer: No.*

**Question 17. Can we drill into the concrete floor in front of or below the podium to install the Press Feed #5 Box?**

*Answer: Yes. You must coordinate with Building Maintenance for any carpet that may need to be repaired.*
